
Kousai Shirato

Fullstack Developer

ABOUT

A Fullstack Developer with a broad and versatile programming skill sets.

As a kid, I was really into playing Go, and as an adult, programming has become the outlet for me to express my creativity.

I enjoy building applications, designing their architecture, and scaling them and I am a strong advocate of delivering top-quality, high-value products that ensure success.

ADDRESS

Japan, 〒602-0858 Kyoto, Kamigyo Ward, Higashisakurachō, 10

BIRTHDAY

14 Sep 1992

EDUCATION

Osaka University
Sep 2009 - June 2013
With a Bachelor's Degree in Computer Engineering, numerous hands-on experience in software development, and the ability to solve problems in a timely and accurate manner.

WORK EXPERIENCE

FULLSTACK DEVELOPER
Omneky omneky.com April 2021 - Nov 2022

- Created frontend using UX design in a pixel-perfect and user friendly way.
- Upgraded version and refactored project structure and architecture.
- Redesigned front-end for ads services, and maintained a web application.
- Built test automation using RSpec, Capybara, and Selenium.
- Integrated with ElasticSearch.
- Set up functionality to automatically update sales demos.
- Added new background tasks and notifications.
- Developed CI-CD implementation using Jenkins, Docker, and AWS.
- Containerized applications using Docker: Created Docker files, and built Docker images for microservices to run on the Kubernetes platform.
- Developed various Apis to manage ads.
- Fixed ads not displaying correctly, preventing a loss of revenue.
- Implemented JavaScript test cases using Mocha, and Enzyme and performed end-to-end tests.

Technologies : Node.js, Java, Spring boot, SQL, Firebase, AWS, Docker

FULLSTACK DEVELOPER
Identity identity.com Sep 2019 – Feb 2021

- Connected with smart contracts on the blockchain Network with Web3, wallet services.
- Added swagger UI for API documentation.
- Implemented JavaScript test cases using Jest, and Enzyme and performed end-to-end tests.
- Developed CI-CD implementation using Jenkins, Docker, and AWS.
- Updated front-end using web3.js and integrated back-end APIs.
- Developed best practices, writing reusable code, good code programming standards, best practices for Unit testing, and drafting documents.
- Created smart contracts using Rust and integrated them with front-end and back-end.
- Involved in unit testing and integration testing in the development environment and ensuring the application is according to specifications.

Technologies : Node.js, React.js, AWS Lambda, Firebase, MongoDB, Blockchain, Web3, Smart contracts

SKILLS

- Html, Css, Javascript
- TypeScript
- React, Redux, Redux-thunk, Next.js
- Angular, Rxjs
- Vue.js, Vuex, Nuxt.js
- Node.js, Express.js, Nest.js
- PHP, Laravel, Magento Wordpress
- Shopify
- Java, Spring boot
- Python, Django
- Golang
- Web3.js, Ethers.js
- Jest, Mocha
- MongoDB, SQL, MySQL, Postgresql, GraphQL, Cassandra
- RestAPI
- Elasticsearch
- WebRTC
- gRPC
- Storybook
- Solidity | Web3 | Ethers
- BTC | ETH | BSC | Polygon
- Avalanche | Solana
